## System Advantages

Propane heater is flow rated and post heat after the Oil To Water Heat Exchanger. Only lights when water temperature is below 167 degrees.

Tankless Water Heater with CSA Approved Regulator, with more safety protection such as flame failure device, anti-freezing protection, over heating protection, Just need 3.6PSI of water pressure, 4.74 gallons of hot water can be output per minute.

The maximum temperature raise is 167 °F, Applicable only Propane (LPG)

Efficient & Energy Saving - The Propane Water Heater exchanger and main burner are designed with advanced combustion technology to decrease gas consumption and burning noise.

Maximum power output 68,000btu/hour, you will get instant endless hot water easily wherever you are.

Compact and lightweight structure with 11.5% energy saving technology, so you can get more hot water for less money.

Portable Water Heater size and lightweight, takes up less space than other propane systems and uses light fuel to transport.

This tankless water heater comes with CSA approval 5FT Gas Regulator

Does not include propane tank
