The Next Big Thing in Truckmounts
Introducing the Escape® Plus, the first electric truckmount to truly rival gas power! Featuring Three LX vacuums, the Escape Plus’ specs are undeniable: 242+ CFM and 17 in. Hg / 238" – and at a fraction of the cost of gas-powered truckmounts!

You can now enjoy the advantages of electric–such as reduced costs, minimal maintenance, and low environmental impact–without sacrificing raw power.

Mytee ETM-LX-PLUS Escape Electric TruckMount 3/6.6Vacs 1000Psi Trex Shelves Hoses Rake Power Supply Bundle 20231131

The Escape® Plus also comes standard with chemical metering, a 1000 PSI solution pump and a 35 GPM pump-out to make for one seriously incredible machine!
Features

- Three exclusive Mytee® LX™ Vacuum Motors – outputting 242+ CFM and 17 in. Hg
- Autofill and automatic pump-out
- 12 gallon solution and recovery tanks,
- 3.5 GPM pump-out
- 1,200 PSI adjustable solution pump (regulated to 1,000 PSI)
- Chemical metering
- Runs off a single 5′ 4-prong power cord. Draws 30 amps @ 230V 60Hz.
- Weighs only 190 lbs!
- 57,594 vacuum units

Includes

- F200 Lint Hog™ In-line Filter
- 7 qt. Big Mouth™ Bottle for chemical injection
- 2″ x 2.5″ Cuff-Lynx™ reducer
- 2.5″ x 2.5″ Swivel Cuff-Lynx™
- 5004 4-Prong Electrical Converter

Questions and Answers
Q. Will this machine operate on a standard electric clothes dryer outlet?
A. No, uses way too much electricity to safely to this it draws right at 30 amp @240 volts. The national electrical code recommends to operate right at 24 amps @ 240 volts would be preferred. If you plug into a clothes drier outlet try to keep the wand on the floor / carpet, this can reduce the amp draw by up to 20% alone.

Q. What will happen if I used on a standard 389cc or 420cc generator?
A. I expect the generator will operate but something is going to give. This would be like me selling you a car with a top end speed of 120 miles and hour and you try to drive it 140 miles an hour every time you get behind the wheel. Every single generator manufacture recommends that your actual use rating be at least 20% higher that the normal run capacity of the generator. This machine uses 70 amp or 8400 watts of power. That means the run capacity really should be 10,000 watt. This would place the surge or starting capacity at about 12000 watts. That is a 459cc generator or larger using premium fuel or ethanol free fuel. E85 and E87 would not be recommended! Please note the generator would also have to be grounded or bonded to the building. We have discussion in our forums on how to bond the generator to the building.

The above unit had a heat exchanger installed that is currently not available.

Mytee may make changes (upgrades and downgrades) in products it manufactures and markets at any time; these changes are made without obligation to change, retrofit, or upgrade any product previously sold or manufactured. Equipment filled by part number and not by description. Internal parts used for each build subject to change based on parts cost, availability, and or warranty history on past sales.

Can the Mytee Escape LX-Plus actually move 350 CFM?
