Description

Ultra-Compact, Large Category, Integrated Handle and Wheels

*** NOW Part Number [4038500] With Bluetooth-Enabled LGR Dehumidifier

The Phoenix DryMAX BLE Dehumidifier is the perfect choice for restoration professionals who need a high-performing, rugged and portable dehumidifier that can fit in any space.

This model is designed with quality and durability in mind, plus it features advanced features like our exclusive condensate pump.

With its simple-to-use control panel, you have all the information you need on the control screen.

Plus, download the DryLINK app to track performance and make adjustments on the go when paired with our DryPHONE.

The Phoenix Dry Max is 6% smaller than the closest dehumidifier and yet it still has an integrated handle and wheels as well as onboard storage for the power cord and condensate hose!

The ultra-compact design of the Phoenix DryMAX makes it the smallest "Large Category" LGR on the market today. This unit removes 80ppd@AHAM, uses only 5.7 amps, and weighs a mere 63lbs. The Phoenix DryMAX has 170CFM of airflow and comes equipped with a heavy-duty condensate pump, epoxy-coated coils and superior MERV-10 filtration.

The all-new Phoenix Micro-Channel condenser allows us to pack so much performance into such a small dehumidifier.

The feedback on the stacking of the AirMax was so positive we made sure to build superior stacking into the Phoenix Dry Max. We've also added a new four line display which provides you with all the information you need to take readings directly from the home screen.

A new Status Bar is located at the top of the new control panel to give you instant feedback about the dehumidifier from across the room.

Remove only four fasteners and you have easy access to service the unit.

The new Phoenix Dry Max pairs perfectly with our industry leading AirMax. Together you have a compact, portable, stackable, rugged drying system.

Features

- Small, stackable form factor for maximum portability
- Easy to transport at job sites, with a slide out handle and integrated wheels
- Easy service access

>

Control panel
Onboard cord and hose storage
Three-year warranty on pump

Take Readings in Seconds

The Phoenix DryMax BLE is Bluetooth enabled, so you can use the DryLINK® app to take readings in seconds.
Easy to Read Control Panel

No more scrolling through menus to find basic information about your drying jobs. This new control panel adds data logging and Bluetooth capabilities. It is easy to read and has everything you need right on the home screen.
See Your Status, Wherever You Are.

Confirm at a glance that your drying job is proceeding as planned with our status indicator light, or monitor your drying jobs remotely with a DryPHONE and the DryLINK app.
The Most Advanced Condensate Pump

The Phoenix DryMAX BLE includes a condensate pump with a three-year warranty.
Power Up Your Portable Drying Solution

The Phoenix DryMAX BLE pairs perfectly with our AirMAX BLE. Together these two innovative Phoenix products give you the smallest, easy-to-use, rugged, stackable, portable, drying solution on the market!
