

FLASHXtractor™

Leaves Up to 35% Less* Water Behind
Than Competitive Tool

*Every Water Damage School Teaches That Extraction
is hundreds of times faster than evaporation.*

**Less Water = Faster Drying
MUCH FASTER!**

The FlashXtractor Sub-Surface Water Extraction Tool

- Removes More Water in Less Time
- Easy-to-use
- Durable construction - 3 Year Comprehensive Warranty

Multiple every day uses for the FlashXtractor™

Water Extraction

Pet Odor Deodorization

Spot & Stain Removal

Simple design. Great performance.

Patent Pending Design

FLASHXtractor™

Water Claw introduced revolutionary sub-surface extraction tools to the water damage restoration and carpet cleaning industries with the Water Claw Flood Tool and Spot Lifter tool. Now we take the next step in quick, easy, and effective water extraction from carpet and other surfaces with the FlashXtractor™ Subsurface Water Extraction Tool. A patent pending design raises the bar in water removal effectiveness whether working in conjunction with portable or truck mounted extraction equipment. Quite simply, the FlashXtractor™ is the best performing, most cost effective extraction tool on the market.

DURABLE CONSTRUCTION

- The high modulus impact resistant plastic base was injection molded with the 90° angle hose cuff connector molded right into the base. The design was tested for durability by repeatedly driving a GMC diesel pick up truck over the base, without breaking it.
- The height-adjustable, removable, stainless steel handle is spring mounted to make it flexible in order to clean in tight spaces such as under the stairwell and the bracket that holds the handle is molded right into the base.
- No screws to lose or gaskets or seals to replace.
- Most durable tool available - 3 Year Comprehensive Replacement Warranty

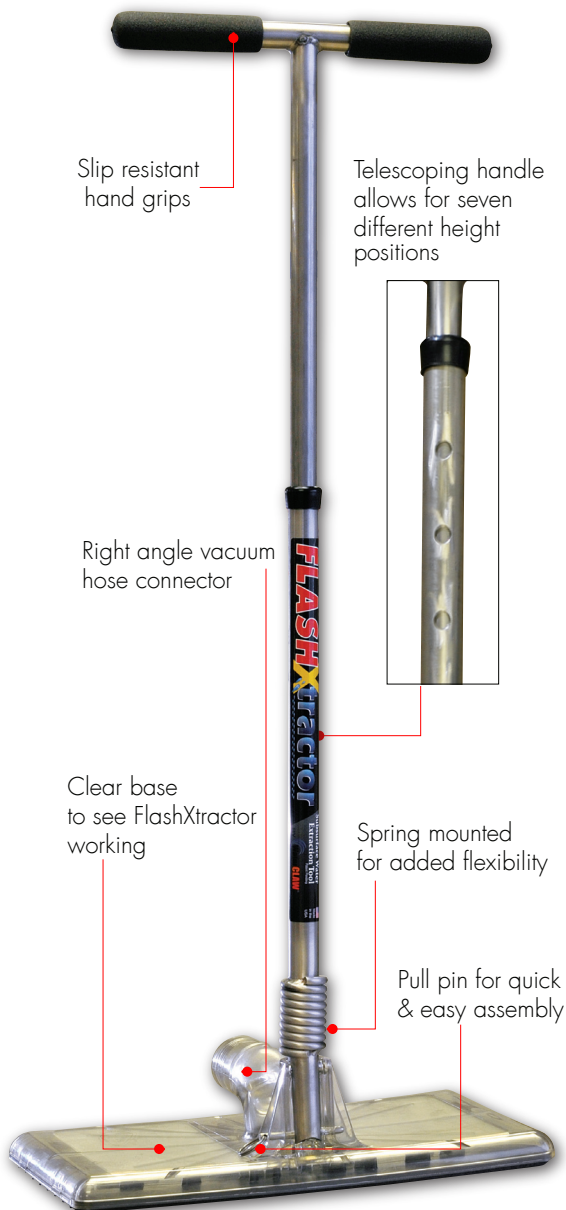

EASIER TO USE

- A flexible, telescoping handle allows the operator to work in tighter places under stairs
- The handle folds up, allowing for compact storage, and the ability to hang on a wall
- Fits both 1-1/2" and 2" Vacuum hose
- Lighter weight reduces operator fatigue
- No vacuum release is necessary due to the ridges incorporated in the design to optimize air flow and suction
- Right angle vacuum hose connector keeps the vacuum hose out of the way
- The technician simply steps onto the FlashXtractor, allowing it to remove incredible amounts of water all the way to the sub-floor, pulls the handle back to break the suction, and repositions the unit to the next spot when you see the water stop flowing
- 16.5" W x 9.5" L

REMOVES MORE WATER IN LESS TIME

- In comparative lab testing it left considerably less water, as much as 35% less* compared to other recently introduced tools.
- Patent pending base design eliminates dead spots so you do not have to do any further wand extraction when you are finished
- Even in black water floods, the FlashXtractor can be used to evacuate more water faster, allowing you to more easily remove, carry out, and dispose of contaminated carpet and pad

Simple design. Great performance.
